Hiring Manager [Company Name]

Subject: Application for Entry-Level Software Developer / MERN Stack Developer

Dear Hiring Manager,

I am writing to express my interest in an entry-level position in software development at your esteemed organization. I have recently completed my Bachelor of Technology in Computer Science from Dr. A.P.J. Abdul Kalam Technical University (GPA 7.6/10) and am eager to begin my professional career in the technology sector.

During my academic journey, I developed a solid foundation in full-stack development, Java, Python, and database management. My capstone project — ExamPrepOnline 3.0 — allowed me to design and develop a complete web-based platform using React.js, Node.js, Express, and MongoDB. This experience strengthened my skills in front-end and back-end development, RESTful APIs, and building scalable, user-friendly applications.

I have also earned certifications in MERN Stack Development, AWS Cloud Practitioner, and Full-Stack Web Development, demonstrating my dedication to continuous learning and adaptability to new technologies. Along with my technical skills, I bring strong problem-solving abilities, teamwork, and effective communication.

As a fresher, I am enthusiastic about the opportunity to contribute to innovative projects, learn from experienced professionals, and grow within a dynamic organization like yours. I am confident that my technical knowledge, combined with my passion for learning and adaptability, makes me a strong candidate for an entry-level role.

Thank you for considering my application. I would welcome the chance to discuss how I can contribute to your team and am available for an interview at your convenience.

Sincerely, Vikash Kumar
